HARDCORE LIVES. HARDCORE KNIVES.

KA-BAR® Knives, Inc.
Since 1898

KA-BAR® HARDCORE LIVES. HARDCORE KNIVES.

We wouldn't tell you to buy a KA-BAR® knife because of its military heritage or because it's a legend in the world of knives.

We wouldn't tell you to buy a KA-BAR® because it comes from an American company with more than a century of knife-making experience.

And we wouldn't tell you to buy a KA-BAR® knife because of its resistance to corrosion, tested strength, unmatched edge-holding ability and out-of-the-box razor sharp blade. Because there's only one real reason to buy a KA-BAR®.

When it comes down to it and you're all alone and your survival depends on a knife, you're going to want a knife you can trust. A knife that won't fail you. A knife that has proven itself time and time again.

You're going to want a KA-BAR®.

KA-BAR®
HARDWARE LIVES. INNOVATIVE KNIVES.

Dear Customer,

In 1996 when the then Alcas Corporation purchased KA-BAR Knives, Inc. it was a decision of the heart and not of the head. How could we let this American icon die and go away? It seemed unpatriotic to not give it a go and try to revive this great brand.

We feel privileged to work for a brand that has meant so much to so many and to have the ability to rebuild the brand in the same American roots that birthed it.

There has been one constant in 115 years: You. Without loyal customers like KA-BAR has companies don't last a decade let alone centuries. We thank you for your loyal support and for loving our brand.

We have been given the opportunity to push this business to the next level. With dedicated customers that have passion for American-made steel, you have tasked us with the challenge of continuing to impress you with innovation, beautiful designs, functional shapes and iconic rejuvenation of classic patterns reborn to work in the field or around the perimeter.

In 2013 we celebrate 115 years of KA-BAR. Of the 45 products that were in the line in 1996, only five still remain in line and one that is/was made in the USA: the 1217 Marine Combat Knife. There are now 85 products made in the USA by American cutlery stemmed in the rich KA-BAR tradition born in 1898.

Our mantra today: "be in touch with your inner consumer." What that means is the ability to place ourselves in your shoes in order to give you everything we would want. We strive for exceptionalism. From product to packaging, messaging, entertainment and service. We are here because of you and your satisfaction is our aim.

We are constantly forward thinking; looking for new trends and directions to give our customers the latest in product innovation.

Thank you again for supporting KA-BAR.

John Stitt

President, CMO

KA-BAR Knives, Inc.

We are proud of our heritage and continue our legacy with the KBD Master Series. The KBD Master Series is a collection of KA-BAR® manufactured knives designed and authenticated by the leading outdoorsmen, survivalists, uniformed professionals and military experts in the U.S. To see the KBD Master Series and our full product line visit us at KA-BAR.com.

KA-BAR®
HARDWARE LIVES. HARDWARE KNIVES.

Leather Handled Fighting/Utility Knives

During WWII a legend was born, as several companies were asked by the U.S. Government to help supply troops with combat/utility knives.

KA-BAR® stepped up to the challenge and their reputation became so strong that all who are familiar with this knife refer to any of its kind simply as the “KA-BAR”.

The world’s most famous fixed-blade knife is still doing its job, with honors and is still made right here in Olean, New York U.S.A. almost 70 years later.

Neither the Department of the Navy nor any other component of the Department of Defense has approved, endorsed, or otherwise authorized this product.

1217 USMC Fighting/Utility Knife
Blade Length 7"; Overall Length 11-7/8"

Shortly after the start of World War II, KA-BAR began working with the Marine Quartermaster to design a fighting knife for the United States Marine Corps. Soon, production was under way on the fighting/utility knife that would later make KA-BAR a widely recognized name.

When the war escalated, the demand for the fighting/utility knives became so great that KA-BAR could not keep up. As a result, the government assigned several knife companies to create similar knives for those serving during the War.

Still, KA-BAR's wartime production totaled more than one million knives. The KA-BAR knives became so well recognized for their quality and so abundant that "KA-BAR" became the name by which most referred to the fighting/utility knife.

KA-BAR® applies gold-colored paint to their standard KA-BAR® knives to create intricately detailed works of art meant to honor and commemorate those men and women in uniform who serve our country. Active-duty and retired military personnel will appreciate the thought and care that goes into each of these collectable pieces.

All commemoratives look stunning on display. Your knife will float gracefully on a desktop inside our Dome Presentation Case. For wall mounting, the Walnut Presentation Case carefully cradles your commemorative between a lockable, hinged glass front and a red velour-lined pillow. If you prefer a less traditional display method, our Excalibur Display keeps your knife at the ready for up-close, hands-on viewing.

When you see this icon, know that this product is being made by family, friends and neighbors right here in the USA.

KA-BAR®
HARDCORE LIVES. HARDCORE KNIVES.

Kraton G® Handled Fighting/Utility Knives

It's tough to argue with the success of the world's most recognizable, time-tested fixed-blade knife so KA-BAR® did what any smart company would do, we didn't change the original design, we expanded upon it.

The high-carbon, non-reflective black blade is epoxy powder-coated and tests prove the finish is more durable than ever. The classic oval shape of the original KA-BAR® remains and has been modernized with a material nearly impervious to sweat, chemicals, water and wear, Kraton G®.

KA-BAR®
HARDCORE LIVES. HARDCORE KNIVES.

Becker Knife & Tool Designs Knives that work for a living.

Ethan Becker founded Becker Knife & Tool in the early 1980's and set about designing, manufacturing and selling the industrial-strength tactical and survival knives that he had always wanted for himself. His products, the BK&T line, have gone a long way to making these now popular all-black knives in demand.

Mr. Becker spends as much time as possible in the outdoors testing a variety of equipment and knife designs, and also works to expand his primitive and outdoor skills. He collaborated with KA-BAR® in 2008 to reintroduce and update his best selling models and together we continue to design new models to expand the line.

BK2 Becker Companion
Blade Length 5-1/4"; Overall Length 10-1/2"

KA-BAR®
HARDCORE LIVES. HARDCORE KNIVES.

TDI Law Enforcement Knives

The Original TDI Knife was designed by John Benner, founder of Tactical Defense Institute. Designed by an officer with officers in mind, TDI fixed-blade knives are meant to be worn at the off hand and draw like a pistol.

In extreme close quarters where a suspect is attempting to take an officer's handgun, the TDI fixed-blades are available as a last defense option. Coupled with friction sheaths, the units easily mount on an officer's pant belt and conceal behind the various gear worn on his duty belt.

Single hand opening, non-automatic, ambidextrous, folding knives are low profile and lightweight and there to meet your specific law enforcement needs.

1480 TDI Law Enforcement Knife

Blade Length 2-5/16"; Overall Length 5-5/8"

TDI Accessories

#1480CLIP TDI Metal Belt Clip

Fits all TDI fixed blade knives except 1478BP. Also fits Becker Necker (BK11) and Eskabar (BK14).
MSRP: \$11.50

#1490 TDI Fanny Pack

Heavy-duty black polyester carry-all pack accommodates up to a full-size firearm, plus still has room for your knife, magazines and badge.
Fits up to a 42" waist.
MSRP: \$45.54

#1491 TDI Courier Pack

Heavy-duty black polyester pack. Fitted with MOLLE loops that accommodate most gun holsters and your TDI knife. Still enough room for important papers, gym gear, and other daily necessities.
MSRP: \$45.54

Original TDI Half-Serrated

KA-BAR®

HARDWARE LIVES. HARDWARE KNIVES.

Glossary of Terms

Caring for your KA-BAR®

Wipe blades after use with a dry, soft cloth. If knives are exposed to salt water, wash with mild dish detergent, rinse with tap water, then wipe with a dry, soft cloth.

Storing

Treat blade with a light coating of mineral oil before storing in a dry area separate from its sheath. If possible, store in paper sleeve provided with the knife at purchase.

Sharpening

Keep knives sharp by touching up edges as needed. Most KA-BAR® knives can be sharpened using an Arkansas stone or commonly available sharpening system. Most knives can easily be touched up using a coarse or hard stone.

When bringing back a very dull edge a coarse or hard stone should be used first, followed by a finer, softer stone.

Knives made with D2 steel require diamond or ceramic sharpeners. Knives should at no time be sharpened on a belt sander or bench grinder. These machines ruin a factory-sharpened edge.

1095 Cro-Van Steel

Easy to sharpen, plain carbon steel used in knife making. Proven to be one of the most popular steels used in KA-BAR® Knives.

440A Steel

A high-carbon stainless steel used in many American production knives.

Clam Pack

A clear plastic packaging option that allows products to be hung on peg boards for retail merchandising.

Cryogenic Quenching (CR)

The process of freezing blades to improve blade performance.

D2 Steel

A high-carbon, high-chrome tool steel often used for blanking dies. This steel has excellent edge holding ability but is very difficult to process.

Epoxy Powder Coating

A coating process that protects blades from corrosion and also makes them non-reflective.

Flat Grind

A grind that tapers from the top of the blade down to the cutting edge. Also known as a “V” grind.

Full-Length Tang

Extension of the blade steel that runs completely through the handle to the end of the knife.

Full Tang

A tang that shows all around the handle of the knife between two pieces of handle material.

Game Hook

Also known as a gut hook, this blade shape is best for opening the flesh of game.

Glass-Filled Nylon (GFN-PA66)

Material used to make sheaths. Nylon is reinforced with glass particles and other materials to provide strength and durability while still allowing some flexibility.

LIMITED LIFETIME WARRANTY

KA-BAR Knives, Inc. (the "Company") warrants, to the original purchaser of the knife only, that this knife will be free from defects in material and craftsmanship under normal use and maintenance for the lifetime of the original purchaser. This Limited Warranty does not apply to any failure of, defect in, or damage to the knife caused by normal wear and tear or by improper use, including throwing the knife, using the blades as a can opener, chisel, pry bar, screwdriver, digging tool, or for any heavy work for which the knife was not designed.

If the knife fails to satisfy this Limited Warranty, the Company will repair or replace the knife or substitute a knife of comparable value, at the Company's option, and such repair, replacement or substitution shall constitute the sole remedy for any failure of the knife to satisfy this Limited Warranty or any implied warranty (ies) of the Company. In order to have a Limited Warranty claim evaluated by the Company, you must return the knife, at your own expense and risk, to KA-BAR Knives, Inc., at 200 Homer Street, Olean, NY 14760, attention Customer Service Department. Please include with the returned knife a brief written description of any claimed defect(s) in or failure(s) of the knife. Any returned knife determined by the Company to not be eligible for repair, replacement or substitution under the terms of the Limited Warranty will be returned to the Owner.

THE COMPANY MAKES NO EXPRESS WARRANTY OR REPRESENTATION WHATSOEVER OF OR WITH RESPECT TO THE KNIFE OTHER THAN THE FOREGOING LIMITED WARRANTY, AND ALL SUCH OTHER EXPRESS WARRANTIES ARE HEREBY EXPRESSLY EXCLUDED. ANY IMPLIED WARRANTIES OF THE COMPANY, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS, ARE LIMITED IN DURATION TO THE DURATION OF THIS LIMITED WARRANTY. THE COMPANY WILL NOT BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, AND ALL SUCH DAMAGES ARE EXPRESSLY EXCLUDED.

Some states do not allow limitations on how long an implied warranty lasts, or exclusion or limitation of incidental or consequential damages, so the above limitations or exclusion may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

G10

An extremely durable material made of woven fiberglass soaked in epoxy resin, then highly compressed and baked.

Guard

Also known as a hilt, is the piece of steel that separates the handle and the blade. Serves to keep the hand from slipping on the blade when cutting. Can be single or double.

Hollow Ground

The ground surface of the blade is concave. Used to create a fine cutting edge.

Kraton G® Thermoplastic Elastomer

Referred to simply as Kraton® or Kraton G®, is a man made material resembling rubber that can be molded into knife handles. Provides a non-slip grip. Trademark of Kraton Polymers Group of Companies.

Lockback

A folding knife that has a lock release on the back of the handle.

Manufacturer's Suggested Retail Price (MSRP)

The price at which the manufacturer recommends retailers sell their product. Some sellers may sell above, at, or below this price. This is not determined by the manufacturer.

Micarta®

A man made material, made by layering resin and cloth. Used to make very fine knife handles. Westinghouse trademark.

Powdered Metal

A process used to make shaped metal pieces. Fine metal particles are molded under pressure and then fused under high heat. Also known as sintered metal.

Reclaimed American Chestnut

Back in the early 1900's, Chestnut blight caused a fungus that eventually killed off three and one half billion American Chestnut trees. KA-BAR®'S Traditional Dog's Head Folders are made with handles created from the wood of a deconstructed barn in Hopkinsville, KY, that was primarily framed and sided before the blight with American Chestnut.

Rockwell Hardness (HRC)

An industry scale used for measuring the hardness of blade steel. The higher the reading, the harder the steel. Written as HRC or RC followed by a range of numbers.

Side Lock

Also known as a linerlock. A locking mechanism that features a tab cut out of the liner which is used as a stop to lock the blade in an open position. To close, the liner tab is pushed back to its original position.

Zytel®

A glass-filled nylon material used in making handles for knives. DuPont trademark.

New items are noted in bold. * "Weight" indicates bulk knife weight in pounds. Does not include sheath or packaging. * cro-van = Chrome Vanadium * SS = stainless steel * CR = Cryogenically quenched stainless steel. Blade thickness of all US made KA-BAR® knives starts at 0.165", unless otherwise noted. Epoxy powder coating may alter thickness +.003 to .006". * Fighting/Utility knives feature 20 degree edge angles. TDI Knives and most folding knives feature 15 degree edge angles.
