Karl Elsener

Soldier's knife, 1891

Officer's- and Sporting knife, 1897

High in the picturesque Swiss Alps, the fourth generation of the Elsener family continues the tradition of Multi Tools and quality cutlery started by Charles and Victoria Elsener in 1884. In 1891 they obtained the first contract to supply the Swiss Army with a sturdy «Soldier's Knife». Shortly afterwards, Charles Elsener developed the elegant «Officer's Knife». This revolutionary knife, design officially registered on June 12th 1897, became popular throughout the world because of its high quality, versatility and excellence in design.

Catalog information

The reference numbers in our catalog are listed in numerical sequence so that it is easy to find the item you are looking for. On the left side are the illustrations and on the right side at the same place the indications and the prices with the Bar-Code.

The numbers of the bestsellers are in bold print.

The number indicated besides or below the box symbol \boxtimes 10 refers to the standard contents of the packing unit. Please try to avoid ordering in smaller quantities. In most cases the standard contents are 10, 6 or 12 pieces, rarely 1 or 20 pieces.

The products of the categories 0–3 and 5–6 are manufactured in Ibach.

We **guarantee** all Victorinox Knives and Pocket Tools to be of first class stainless-steel and also guarantee a life time against any defects in material and workmanship. Damages caused by misuse or abuse are not covered by this guarantee.

The **guarantee** for the electronic parts is, as worldwide usual, 2 years.

VICTORINOX

Pocket Tools

We manufacture only some 12 different Pocket Knives with one or two blades, but more than 300 different Pocket Tools or Multi Tools with many features are listed in this catalog and available from stock.

The last figure of the 5-digit **Item number code** of Pocket Knives indicates:

- 1.36 00. = without ring, tweezers and toothpick
- 1. = with key ring
- 2. = with tweezers and toothpick
- 3. = with ring, tweezers and toothpick
- 4. = 3. + Mini-screwdriver
- 5. = 4. + ballpoint pen

The pocket knives are normally fitted with red Cellidor handles with Cross und Shield Logo. Other handles are denoted after the 5-digit item number with the following figures:

- 0.62 00 .2 = blue Cellidor with Cross and Shield
- .3 = black Cellidor with Cross and Shield
- .4 = green Cellidor with Cross and Shield
- .5 = hot pink Cellidor with Cross and Shield
- .7 = white Cellidor with Cross and Shield
- .8 = yellow Cellidor with Cross and Shield
- .16 = smooth Alox, silver with Cross and Shield
- .26 = ribbed Alox, silver with Cross and Shield
- .30 = mat polished steel
- .39 = assorted designs
- .41–.52 = red Cellidor, with Zodiac-emblem
- .61 = genuine Brasil horn
- .66 = genuine staghorn
- .68 = real mother-of-pearl
- .69 = hardwood
- .71 = red Cellidor, with camping-emblem
- .72 = red Cellidor, with fish-inlay
- .87 = gold ingot
- .94 = camouflage
- .840 = Edelweiss
- .T = red translucent Cell. (ruby) with Cross+Shield
- .T2 = blue translucent Cell. (sapphire) with Cross+Shield
- .T3 = black translucent Cell. (onyx) with Cross+Shield
- .T7 = silver translucent Cell. (silvertch) with Cross+Shield

Standard-packing

- a) **black Skai cases** (leather imitation) for Pocket Knives 0.6100–0.6223, 0.64–69, 0.7830, 0.8710–0.8720
- b) **silver color gift boxes** for 0.62.. + 0.63.. with LED or ballpoint pen
- c) **silver color gift boxes** for CyberTools, SwissChamp, Sets and Kits
- d) **luxury cases** for Zodiac, Goldplated, Golden– and real Mother-of-Pearl-Handles

Domestic and Professional knives

To avoid the chromium-plating of carbon-steel knives, Charles Elsener, the oldest son of the founder urged a steel-mill to develop a stainless-steel that could be hardened. After many trials he manufactured in Ibach the first stainless-steel knives. As the results were not quite satisfactory at the beginning great efforts were made the following years to improve the quality of the stainless-steel knives. In 1931 the firm Brown Boveri in Baden/Switzerland was assigned the task of installing at Victorinox Ibach the world's first fully electric steel hardening plant. Afterwards the Victorinox professional and butcher knives became famous first in Switzerland, France and the USA and later worldwide.

The **Fibrox** plastic handle meant yet another breakthrough for Victorinox. It was developed on the basis of the most modern ergonomic findings and convinces its users through optimal safety and anti-slip characteristics. All Fibrox handles can be sterilized up to 150° and are in compliance with ruling (EG) 1935/2004.

The last figure of the 5-digit item number code indicates:

- 5.04 00 = polished rosewood handle
- 1 = red polypropylene handle, dishwasher-proof or red anti-slip, sterilizable Fibrox handle for professional knives
- 2 = blue polypropylene handle, dishwasher-proof or blue anti-slip, sterilizable Fibrox handle for professional knives
- 3 = black polypropylene handle, dishwasher-proof or black anti-slip, sterilizable Fibrox handle for professional knives
- 6 = other shape of handle
- 7 = white polypropylene handle, dishwasher-proof
- 8 = yellow anti-slip, sterilizable Fibrox handle for professional knives
- 9 = lacquered bubingawood handle

Where knives are available in several sizes, please note the length of blade which follows the 5-digit item number code, i.e. 5.18 00.15 or 5.20 33.22.

On the illustrations and pricelists pages 22, 26–35 you will find the knives with wooden handles on the left and the corresponding ones with dishwasher-proof polypropylene and Fibrox handles respectively on the right.

Packing

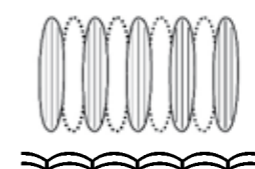

The **paring knives**, page 22, with rosewood and bubingawood handles are supplied in boxes of 6 pieces and those with polypropylene handles with patented blade protection in boxes of 20 pieces.

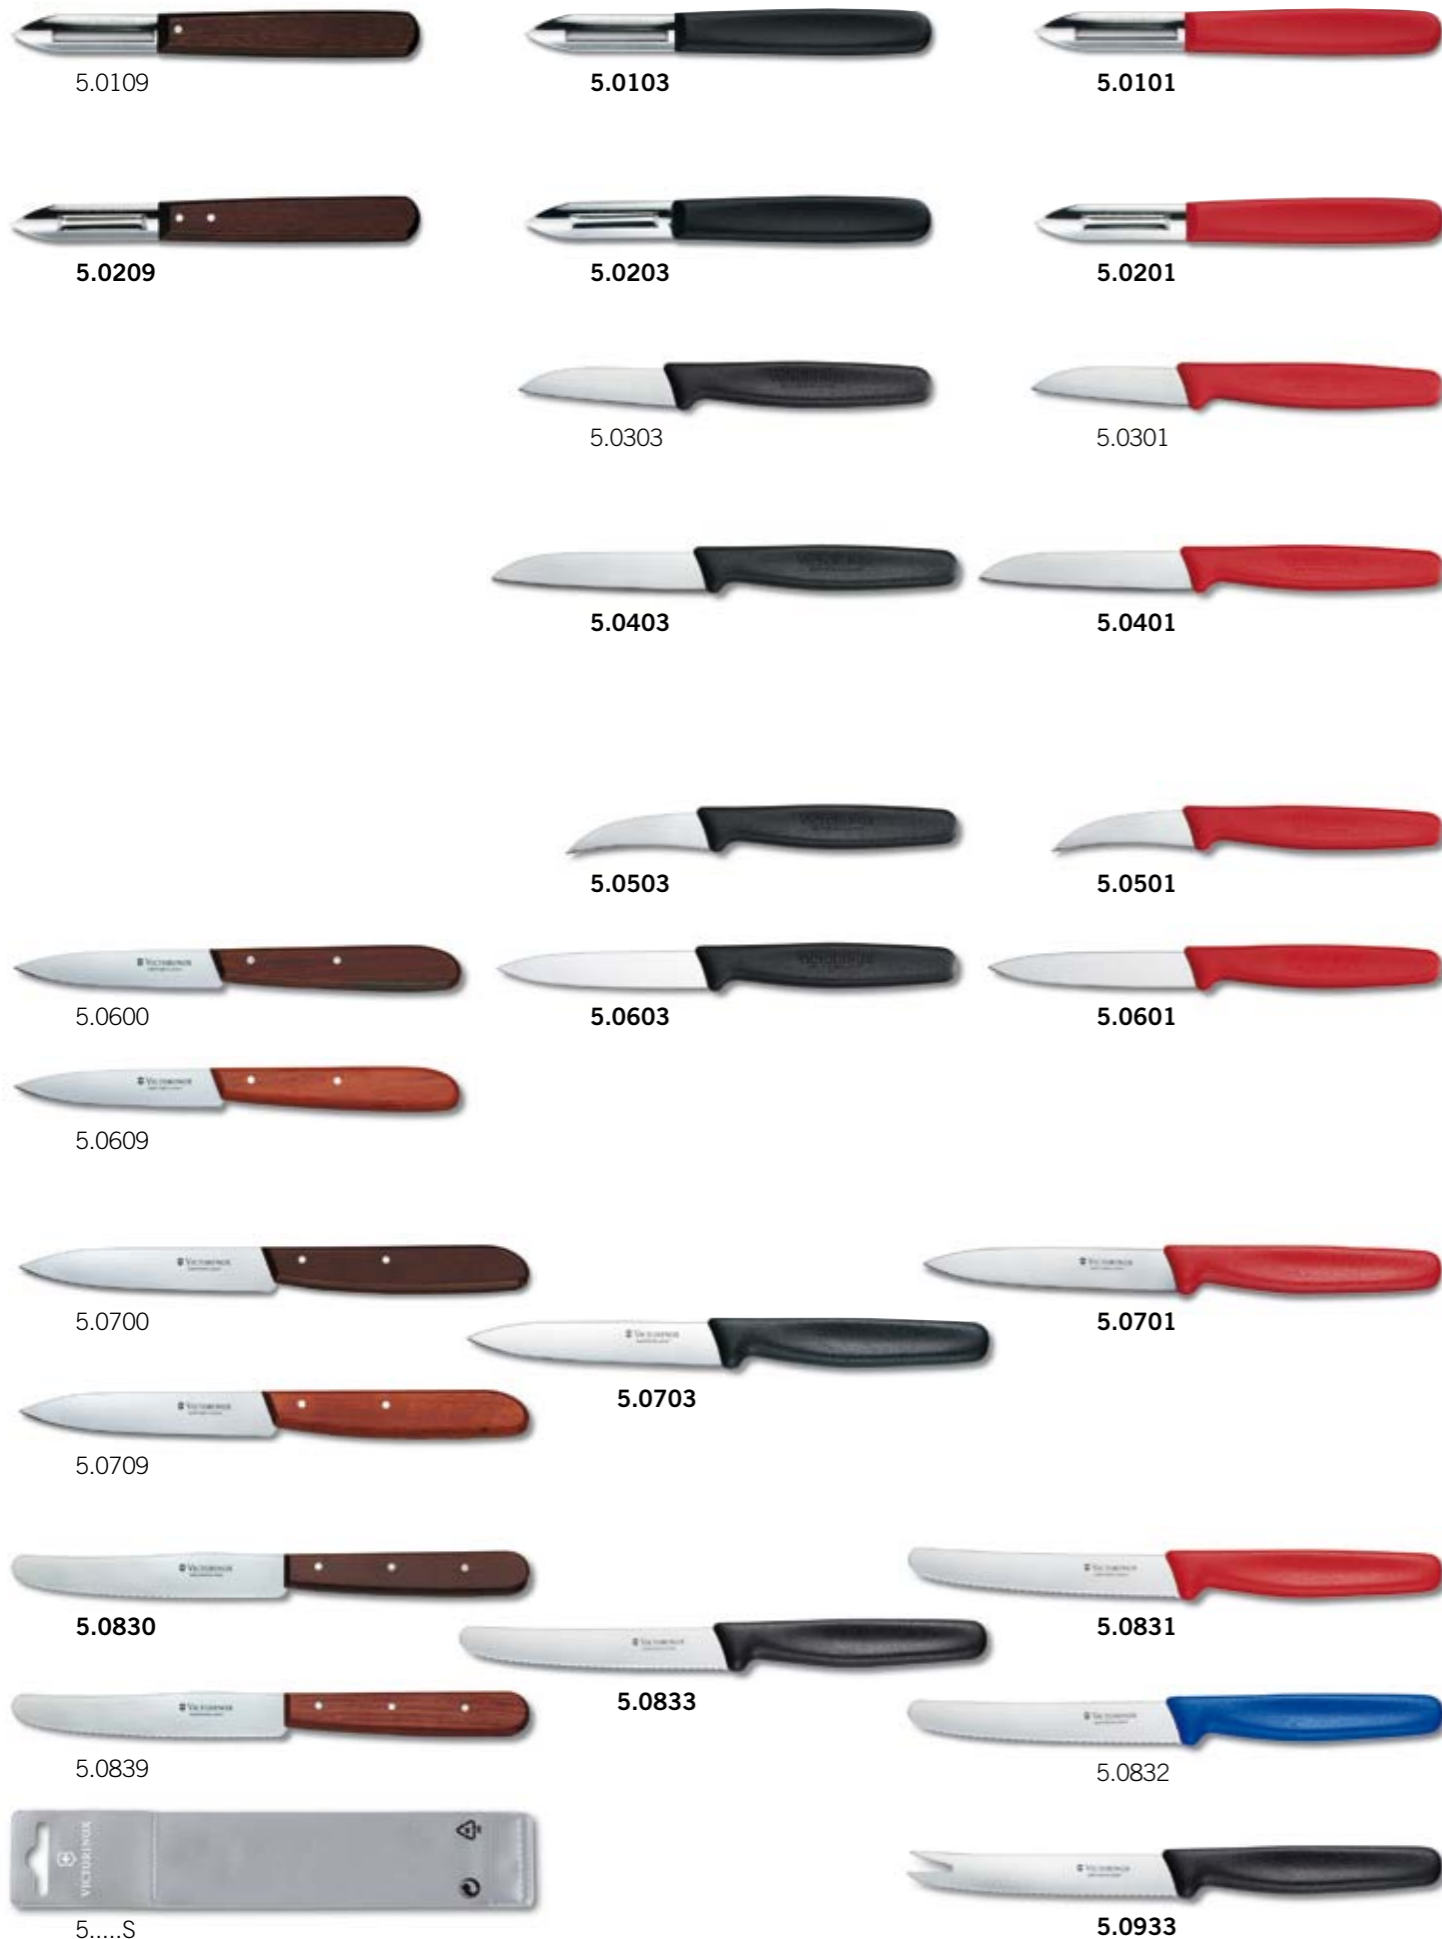

The **household and slicing knives** are supplied without extra cost in individual self-service wallets in boxes of 6 pieces, excepting the following models:

- Page 26: 5.1733, 5.2060–63
5.2000–5.2033 **only 25–31 cm**
- Page 28: varying kinds of packing

The penultimate figure denotes:

- 5.41 00 = normal straight edge
- 10 = flexible blade
- 20 = fluted edge
- 30 = wavy edge
- 50 = micro-denting
- 60 = other shape of blade
- 70 = 00 + saw edge

			7.8715 5 Knife sharpener Victorinox

To save time and unnecessary cost the small vegetable knives Nr. 5.0301–5.0833 (see page 22) are supplied in boxes of 20 pieces. Thanks to the optimal blade protection they can be emptied directly into the sales boxes. (If blistered they would have to be hung up individually). On blister cards these small, very priceworthy vegetable knives would suffer an unnecessary and disproportionate price increase of about 20%.

On page 38 you will find the new, ergonomic «Swiss Classic» range (Nr. 6.7111–6.7833) and on page 38a the large kitchen knives (Nr. 6.7113–6.8713) with the more expensive but comfortable «FibroX»-handles.

6.8003.22B	10	Carving knife blade 15 cm Fibrox black on blister					

The items 6.8003–6.8713.20 are supplied only with the more expensive but comfortable Fibrox handles.

For additional knives on blister cards see page 24b.

Ceramic knives are becoming increasingly popular: The benefits are the best possible cutting quality, the blade remaining sharp over a very long period and the blade's neutrality with regard to taste. The blades of ceramic knives are manufactured from high-purity zirconium oxide powder, compressed at very high pressure and sintered in special sintering furnaces at temperatures of 1500 °C. This results in a blade that has an extremely high level of hardness. Ceramic is almost as hard as diamond.

Thanks to the ceramic material, the knife is very light and weighs only half as much as a steel knife of the same size.

It is resistant to corrosion and, thanks to its smooth surface, is insensitive to acids. As a result of the high level of hardness, the blades remain sharp for a very long time. As a result of the high density of the surface, ceramic knives are very easy to care for: simply wipe with a damp cloth, let dry and carefully store in the protective cover.

Advantages of ceramic knives

- durable and extremely sharp
- light and handy
- does not transfer taste or odor
- hygienic and anti-allergic
- food safe
- resistant to corrosion and acids
- low maintenance

Item No.

NOTICE: These protective gloves are «cut resistant, not cut proof». These gloves are sold individually, not in pairs. These gloves are «ambidextrous» and can be worn on the left or right hand. In a typical application, only one glove would be worn (usually on the hand not holding the knife). Butchers, meat cutters and some food preparation workers will wear the «Performance Shield» or «Ultimate Shield» glove on the knife hand, and the «Knife Shield» on the hand opposite the knife.

Ultimate SHIELD

Exceptionally high cut resistance. Durable, flexible and very comfortable. Made using a patented combination of stainless steel wire, encapsulated in a sheath of polyethylene and wrapped with a high performance polyester
Applications: Liner Glove, Knife Hand Glove in slaughterhouse, food preparation or food service

7.9030.S	1	Small (Red Banding)	
			7 611160 705372
7.9030.M	1	Medium (Green Banding)	
			7 611160 705389
7.9030.L	1	Large (White Banding)	
			7 611160 705396

Knife SHIELD

The highest level of protection and cut resistance. Soft, flexible, bright white, wire free
Applications: Wherever the highest level of protection is required. Slaughterhouse, food processing (hand opposite knife), butchers, pork & poultry processing operations

7.9031.S	1	Small (Red Banding)	
			7 611160 705341
7.9031.M	1	Medium (Green Banding)	
			7 611160 705358
7.9031.L	1	Large (White Banding)	
			7 611160 705365

Flexi SHIELD

Excellent cut resistance. Lightweight, flexible, bright white, machine washable, bleach-safe
Applications: General applications. Food service, restaurants, delicatessens. Liner Glove, high degree of cut resistance, excellent for applications requiring moderate protection

7.9032.S	1	Small (Red Banding)	
			7 611160 705310
